Combination of resilient non-asbestos fibers and PTFE offer a true non-contaminating general service packing - ideal where a clean, reliable packing is required.

Typical applications are rotary, centrifugal, and reciprocating pumps for such services as mild acids and alkalis, air and dry industrial gases, petroleum and synthetic oils, aromatic and aliphatic solvents, and fluids where non-contamination is required.

PACKMASTER® 3 is a soft and resilient spun synthetic packing saturated throughout with petrolatum and graphite which offers added sealability. This product is particularly suitable for older or worn equipment or scored shafts - construction is more readily deformable to meet these conditions. PACKMASTER® 3 is commonly used for distillation units, cooling water systems, diesel and lubricating oils where low to medium pressures are encountered. It can also be found in use for hot & cold water, very mild acids & alkalis, rotary, centrifugal, reciprocating pumps, & low pressure static seals.
